

Job Role: Senior Infrastructure Engineer
Location: Bristol (Castlemead, Lower Castle Street, Bristol, BS1 3AG)
Salary: £46,000 to £50,000 per annum
Employment basis: Permanent
Working hours: 37.5 hours/week. Min. 4-days per week in the office, 1-day WFH
Start date: 1st September 2026

We are recruiting for a Senior Infrastructure Engineer to be based within our growing team in Bristol. This is a great opportunity to work within a small but rapidly growing business alongside other experienced engineers.

We work for a wide range of clients but the majority of our workload at present is residential development in the South West of England. The role will involve being first point of contact and lead design engineer developing proposals to support planning applications/reserved matters applications and then progressing those through to the detailed design and technical approval stage.

You will support senior staff in delivery of some schemes but also be expected, and given the opportunity, to take a hands-on and client-facing role in the design and management of your own schemes. You will also be expected to help mentor junior staff and guide technicians to produce design drawings.

Essential skills:

- Private drainage & external works design
- Levels design
- Drainage & SuDS design utilising Flow modelling software
- Highway Alignment Design using Causeway PDS software
- Cut & fill assessments
- Prepare and submit S278, S38, S104 etc applications for technical approval with the relevant authorities
- Liaising with clients and local adopting authorities
- Mentoring of apprentice technicians

Qualifications: (Required) HNC Civil Engineering or Beng Civil Engineering
